

LS-71/K

**Roll-on hot stamping machine
for decoration of small flat
plastic moldings in the automo-
tive field**

The roll-on hot stamping machine LS-71/K is an advancement of the popular LS-71. The horizontally conveyor system with integrated jigs allows a more economic decoration of small flat plastic moldings than in the vertical hot stamping method.

General Features

- pneumatically controlled up-and-down movement of the stamping head
- micro-adjustment stamping stroke limitation
- endless conveyor chain with integrated jigs with electronic speed control, manual part feeding
- foil feed with foil rewind motor
- easy access to machine adjustments and controls

Specifications

Stamping width	150 mm
Clearance	max. 120 mm
Roll-on speed	0.6 – 12 m/min adjustable
Stamping temperature	100 – 400 °C electronically controlled
Electric supply	400 V, 50 HZ, 3 Ph, 2.3 kW
Compressed air supply	max. 10 bar
Nominal width	1/4"
Width	0.92 m
Depth	1.9 m
Height	1.7 m
Weight	400 kg
